SUMMARY

I'm a full-stack developer with hands-on experience in building web applications. I work with React/Next.js, JavaScript, Node.js, and Express.js for frontend and backend development. I have experience working with databases, APIs, Git, and GitHub.

EDUCATION

Bachelor of Technology July 2025 - Present
Indian Institute of Technology Roorkee, Roorkee
CGPA: 8.8

SKILLS

Programming Languages: HTML, CSS, JS, Python, SQL, C, C++,

Software Packages: ReactJS, NextJS, ExpressJS, Git, Github, NodeJS, TailwindCSS, MongoDB, PostgreSQL

Language: English, Hindi

PROJECTS

Inventory and Asset Tracking System
FullStack Project

- Built a web application for managing inventory and asset records.
- Developed CRUD operations, search, filtering, and reporting features.
- Implemented authentication and secure API architecture.
- Designed responsive dashboards using React and backend services using Node.js and Supabase Postgres.

RoomView3D
3D Visualization

- RoomView3D is a full-stack web application that provides an interactive 3D room visualization experience.
- It combines a Python backend with a React (Vite) frontend to simulate and render room views in real time, enabling users to explore and interact with 3D environments through the browser.

Official Website for Hamrock Society, IIT Roorkee
3D Visualization

- Designed and developed the official website for the department society.
- Built responsive frontend using React and modern UI components.
- Managed deployment, content updates, and overall digital presence.
- Improved accessibility and user experience across devices.

LEADERSHIPS AND ACHIEVEMENTS
